Part 2 - CHRIST OR CHRIST CONSCIOUSNESS

In part one in our last issue, we discussed the difference between Christ and christ consciousness. Jesus is the Christ (literally: anointed -> the Messiah or savior). Christ consciousness is, very simplified: We are spirit in nature. We are part of a consciousness of the universe. We need to tap into the cosmic consciousness to become better people and have contentment on earth. We mentioned that those looking for christ consciousness believe that the Bible has been modified over the years. Legitimate research discounts those claims. Though a very few typos have crept in, the message of the Bible has been maintained amazingly well.

And we showed that gospels not included in the Bible were rejected for good reason. One of those reasons being the extreme subordination of women taught in *Gospel of Thomas*.

Those who seek christ consciousness have accepted that Jesus lived (that is a documented fact) and that he did

- Something on many fields of science.....

Carving the Grand Canyon

How long did it take to carve the Grand Canyon? That question has had different answers over the years.

Before the 1930's, evolutionists proposed that it took 40 million years. The Colorado River supposedly eroded the canyon at exactly the same pace as the Colorado Plateau rose in height. (*Science news*, 9/30/2000).

We wish we had written it down in 1977 when we first visited the Canyon, but I recall the signs saying it

took 30 million years.

By 1987, the time had dropped to 4 million years. (Hoffman, 1987, p.12). That is quite a drop in age.

In the March 2003 issue of *National Geographic Kids*, on page 7, pictured above, a new estimate is given. Their

See Canyon on page 2

Age of the Earth - Population Growth

How long would it take to populate the earth with 6 billion people? First, let's look at what evolutionists and creationists predict from their theories:

Evolutionists say: The population growth rate over time has been almost zero. **Reason:** Man/humanoids have been around for nearly 1,000,000 years. To grow from 2 people to 6 billion people over that amount of time would necessitate a very tiny birth rate.

See Population on page 3

MEETINGS

These meetings will feature a 1 hour video followed by discussion.

Meeting Day	Time(s)
Thursdays	7:00 PM
Saturdays	3:30 & 7:00 PM

Unlocking the Mystery of Life

- Several former evolutionists explain how they were forced by the scientific evidence to accept the intelligent design of life.

Evidences - Explains how modern geologists, old earth & young earth, now believe at least 1/3 of all sediments were rapidly deposited as mud flows.

In the Beginning - Shows how Noah's flood best explains sediment layers, mountain building and the ice age.

Canyon continued from p. 1

new estimate is 750 thousand years! Evolutionists have gone from 40 million to 3/4 million years!

Then we read further in the article:

"...the Canyon grew in quick, violent spurts from massive flooding..." As creation scientists have been saying for four decades, only massive

flooding could carve the Grand Canyon and leave it as we see it today. In order to stretch the time period as much as possible, the evolutionists declare it happened in several "spurts." How did these massive spurts occur? What do we see happening today that could produce the scale of flooding needed to carve the Grand Canyon in spurts?

Current thinking by creation scientists is that after Noah's flood, a huge upland sea was covering much of the area north of the Canyon. Within a few hundred years after the flood (about 4300 years ago), the rock containing this sea was breached. As has been proven at Mt. St. Helens, a huge canyon can be carved in solid rock in a few days (we will feature this 1984 geological catastrophe in our next issue). Once the water

started flowing over the top of the rock, carving started and within a few weeks, the canyon was carved.

Many evolutionists who study the Grand Canyon agree with this idea. Of course, they think it happened a million years ago, but many agree with the method and amount of time it took to carve the canyon. Nothing smaller than one massive catastrophe can account for the canyon. Several "spurts" doesn't fit scientifically.

It is appropriate to write about this movement on the part of evolutionists because creation science was started in 1961 by a book written by Dr. Henry Morris called *The Genesis Flood*. Dr. Morris was head of the engineering department of Virginia Polytech at the time. His Ph.D. is in civil engineering with a specialty in hydraulics (moved or operated or effected by liquid). Evolutionists called *The Genesis Flood* non-science and pseudoscience 40 years ago ... and still do today. Yet, the evolutionists now agree with the basic mechanics proposed in the book.

Which scientists best explained the facts 40 years ago? Do you think the same scientists might also explain the facts best today? Why? 

The official Grand Canyon Guide gives a carving time of 5-6 million years with the bottom half being carved in the last 750,000 years.

How To make a Fossil

There are many ways to make a fossil: Burial in mud, petrification (minerals turning buried vegetation into fossils such as the petrified forests), capture in amber and several others. They all have one thing in common. The organism must be cut off from scavengers, bacteria and air almost immediately.

Do we find dead fish becoming fossils at the bottom of the ocean? No. How about coyotes in the wild around us? No

These situations do not result in preservation. Even skeletons erode away in under 100 years in the dryness of Arizona. ALL fossils are the result of burial in mud or other material. Every time you find a fossil, there was a catastrophe. The idea that fine layers can build up at a rate of inches per thousands of years is not supported by what we know today.

In 1977 we visited Dinosaur National Monument. The naturalist explained that the dinosaurs went to dinosaur graveyards to die. There was no other way to explain how dinosaurs could be so entangled and built up to a height of over 32 feet (that is just the part in the quarry building).

By 1995 it was river floods that swept the dinosaurs away and buried them. But river floods would have to be huge and repeated and follow each other in rapid succession to accomplish this. And the same thing happened in many parts of the world.

Can you see the trend? In believing in long ages of time, the religion of Naturalism made assumptions that required long times. When confronted with real science, the time sequences are shortened at Dinosaur National Monument, the Grand Canyon and many other places.

The reasonable explanation is a worldwide flood, brought by our Creator and Judge: Jesus, as described in the Bible... The flood of Noah. 

QUOTE:

"There is not one shred of evidence for any of this ridiculous make-believe about feathered dinosaurs that will withstand scrutiny."

Dr. Storrs Olson,

Bird Expert, Smithsonian Institute, Nov. 1, 1999 in a letter to *National Geographic*.

Read the entire letter by going to our home page at <http://www.cryingrocks.org>.

Why do evolutionists continue to accept make-believe science? When "pre-human" Piltdown Man was discovered, one scientist said it was a fake as the teeth had been filed. Over 300 scientists wrote their Ph.D. dissertations on Piltdown Man with their Ph.D. advisors already having accepted the "facts." Only after the person who originated the **hoax** confessed did scientists finally see filed teeth. WHY? Because they want to prove the Bible wrong. They dislike accepting that Jesus is our Creator. He spoke all creation into existence about 6000 years ago.

Population continued from p. 1

Creationists say: The population rate has been about the same as it is now. **Reason:** We have wars, natural

disaster and disease today just as there has always been. Today, in undeveloped nations, the birth rate is quite high. Based on birth rates being MUCH lower than in undeveloped nations today, two

people 4500 years ago would expand to 6 billion today.

Let's look at some predictions and facts:

Evolutionist Prediction	Creationist Prediction	Observed Fact	Conclusion
<ul style="list-style-type: none"> • Man has been in existence for 1,000,000 years. • Population has grown at a rate of less than .01% • Evolutionists make no prediction on how many human fossils there could be. • The Stone Age lasted 100,000 years with 1 to 10 million people alive at any given time. 	<ul style="list-style-type: none"> • We are descendant from Noah and his wife. They lived 4300 years ago. • Population has grown at near the current rate of 1.7%. • There would be few human fossils as few humans have lived and very few buried to become a fossil. • There was no "Stone Age." There was a brief period of "primitive" life after the Tower of Babel. 	<ul style="list-style-type: none"> • Studies in mtDNA (the genetic code) have been used to support an age of 80,00 to 250,000 since Eve... ASSUMING they knew in advance the rate of change and that there were multiple males available to give breadth to the gene pool. Recent studies looking at actual mtDNA in actual populations show the rate to actually be much different and supports Eve living less than 6000 years ago. • The rate of population growth in undeveloped nations is as much as 3.0%. The growth rate before modern medicine was much higher than today in developed nations such as the USA. Two people 4300 years ago would expand to 6 billion today with a growth rate of just .5% which less than 1/3 the current average worldwide birth rate. • Very few human fossils are found (except in cemeteries/burial sites and there aren't many of those). If man has been around as long as evolutionists say, with a growth rate of just .01%, over 10⁴³ people should be alive today and more than that number have been alive. If only one in 10,000,000 became a fossil there would be at least 1,000,000 fossils in easy to find locations. There are a few. • "Stone Age" humans buried their dead, most times with artifacts. If 1 million was the usual population, they buried 4 billion humans. If 10 million was the usual population they buried 40 billion. Only a few "Stone Age" fossils/artifacts/burial sites exist. 	<ul style="list-style-type: none"> • mtDNA research supports the first human female living about 4300 years ago. • The Creationist view fits the facts. • There are not enough human fossils to fit the evolutionist view. • Too few human fossils to support the idea of 100,000 years of "Stone Age."

We don't have enough space to show you the many more population growth facts. None of them fit the pre-

dictions of evolutionists. We have four web site links on our web site home page that will give you all the information and

math. We must ask the question:

Which predictions fit the facts? 

Christ continued from p. 1

spectacular miracles. When we were of the same persuasion I had a friend who said Jesus had an aura 6 miles in diameter. That is quite a large aura. No doubt, he was meek while strong, caring and compassionate, just what everyone would really like for a king or friend.

Ignored or grossly distorted are his words. Nobody wants this compassionate person to say things like: Matt. 10:32-37 *Everyone therefore who shall confess Me before men, I will also confess him before My Father who is in heaven But whoever shall deny Me before men, I will also deny him before My Father who is in heaven. Do not think that I came to bring peace on the*

earth; I did not come to bring peace, but a sword. For I came to set a man against his father, and a daughter against her mother, and a daughter-in-law against her mother-in-law; and a man's enemies will be the members of his household. He who loves father or mother more than Me is not worthy of Me; and he who loves son or daughter more than Me is not worthy of Me.

Ouch. Tough words. Note that you don't seek christ consciousness, you confess Jesus, the person, as God. And where is the peace? O, Jesus was correct. We get some very nice emails and calls from people that disagree with us, but we get some that are unpleasant. Jesus divides. The Red Rock news won't

use Jesus' name in our publicity releases, editing them out.

Why such a explosive reaction? Because we all desire to be our own Gods. We resist any other options. It is our sin nature. But Jesus claimed to be God many times, especially in the Book of John... Son of God and, at the same time, the earthly manifestation of God the Father. They are one, as Jesus said. We want to work our way to our own "redemption." But Jesus offers a gift of redemption which we can do nothing to earn. We simply need to accept the gift. The only redemption available. How incredibly loving is Jesus to offer it as a free gift!

Until next issue... 

From the Editor

Welcome.

As we wrote last time, Guy took a class on the geology of the Verde Valley. It was fun and excellent. Kudos to the professor as he used phrases like "we think" and "possibly." Though he definitely taught the earth is old, his approach and response to a couple of my comments regarding his belief were thoughtful and considerate. But, when asked for an explanation for how the earth could show no signs of erosion

SPEAKER

We are available to speak to your organization or class. We will give lessons to home-schoolers, public school classes (we speak of weaknesses of evolution or Intelligent Design in the public schools), any church, individual person or group who would like to discuss the ideas we represent. If you are interested, please E-mail us at info@cryingrocks.org.

after 10s of millions of years of erosion, he speculated that it was a coastal plain for all that time. That doesn't make sense. Coastal plains erode today in a short time.

Now Guy is off to a conference at Mt. St. Helens. We hope to feature some stories on the science learned there over the past 25 years.

We'll keep digging for good science.

Thanks for joining us!

Guy & Cindy Forsythe

Reincarnation - Just once please

As a former believer in reincarnation, I find science brings on a dilemma. There appears to be two possibilities:

1 Trillions upon trillions of people have lived. That would mean that each of us has lived countless lives attempting to get better. But here we are after all those lives doing evil. We all do things we wish we hadn't done (and hurt people in the process). It doesn't appear that reincarnation is a very good learning process. One life is enough for me.

2 Jesus created the earth 6000 years ago. Based on population statistics, that means that nearly half of the people that have ever lived are alive today. Many people I knew claimed they had lived many lives... one every couple hundred years. But there is only time for one or two, at the most, lives.

We know the population of the earth was less than a billion just a few centuries ago. That would indicate that most (most likely all) people alive today are experiencing their first life. So how have so many lived so many lives?

The Bible says there will be one reincarnation. Why? God promises that those who accept Jesus are adopted into His family, fellow heirs with Jesus. Jesus rose from the dead to assure us we will rise too... into a world that is fully redeemed. No pain. No death. No suffering.

Joni Mitchell's song (*Woodstock*) is wrong. We cannot *get ourselves* back to the garden (of Eden). Jesus gets us back to the garden in our next life right here on a redeemed earth where thistles and briars will no longer be.

We all want to hear the TRUTH! Now you can (inexpensively)..

**Evolution
Cruncher**

Over **900 pages** of **FACTS** about evolution and creation. Many quotes by evolutionists admitting evolution's scientific bankruptcy. We request a donation of \$7.00 or more to cover our costs. Thank you!

If you pick up a copy at any of our meetings (see first page), a \$5.00 donation will cover costs.

We must speak for silence
would shame us, and the
rocks themselves would cry
out... You, O Lord Christ
Jesus, must be praised for
who You are in the world
You have made.

Crying Rocks Ministry

Our Vision...

Each person touched by
Crying Rocks Ministry will
move closer to our Lord
Christ Jesus.

Our Mission...

Develop relationships with
Spiritual seekers to point them
toward our Lord Christ Jesus.
